## EXPERIENCE

### WEB DEVELOPER

2022 - now

Website development, creating complex interfaces, telegram bots, servers administration, product management

### PREVIOUSLY

2012 - 2022

More than 8 years overall in digital, journalism, management, NGO. Last place of work (since 2019) — the Nobel-prize winning International Memorial foundation. Details here: [link to hh.ru](https://link.to/hh.ru)

## WORK EXAMPLES

### MAP.PMEM-EUROPA.DE

Interactive map of spots related to political repressions in the Perm region of Russia. Loaded with a ton of complex multi-level filters and other features, updated on the fly. Created with Vue 3 + Mapbox GL + Wordpress. My part: creating the site from scratch, migrating the database from the old ModX Evolution version with a set of custom scripts, development of the site, its interface, filters etc. In short - everything except for the UI design.

### VEREYA-AIR.RU

Website of an airfield in the Moscow region with custom weather widget, live cameras and other functions. My part - everything, including the UI design.

### LENINSFUNERAL.RU

Site dedicated to the civil campaign for the removal of Vladimir Lenin's body from the Mausoleum on the Red Square. My part - everything except for the UI design.

### T.ME/GYMDAILYBOT

Telegram bot for tracking workout results with cloud database and full CRUD interface. Also exists in a form of Android app. My part - everything.
